Manikandan S

Software Developer

Chennai | +91 9025905492 | manikandan3777s@gmail.com | GitHub | LinkedIn | LeetCode

Professional Summary

Software Developer with hands-on experience in Java, Spring Boot, Flutter, REST APIs, and PostgreSQL. Built scalable backend services and full-stack applications, including a ride-hailing platform published on the Google Play Store. Passionate about developing efficient, high-quality software solutions.

Skills

Languages: Java, SQL, Python
Frameworks: Spring Boot, Spring Data JPA, FastAPI, Flutter
Databases: MySQL, PostgreSQL, Supabase
Tools: Git, Maven, Postman, Android Studio, Figma
Technologies: REST APIs, JPA/Hibernate, Docker

Experience

Software Developer Intern – BDreamz Global Solutions **Jan 2026 – Jul 2026**
Tech Stack: Java, Spring Boot, Spring Data JPA, MySQL, REST APIs, Maven, Git, Postman

- Developed 8+ REST APIs using Java, Spring Boot, Spring Data JPA, and MySQL to implement CRUD operations, authentication, and backend business logic.
- Designed 10+ JPA entities and repository methods following the Controller–Service–Repository architecture for scalable backend development.
- Tested REST APIs using Postman and managed source code, dependency builds, and collaboration using Git and Maven.

Software Developer Intern – TaxiYaar **Mar 2026 – Jun 2026**
Tech Stack: Flutter, Figma, Java, Spring Boot, REST APIs, PostgreSQL (Supabase)

- Led the development and deployment of a ride-hailing platform with separate Rider and Driver applications, successfully publishing both applications on the Google Play Store.
- Designed the complete UI/UX in Figma and developed backend services using Java, Spring Boot, REST APIs, and PostgreSQL for authentication, ride booking, bidding, trip tracking, and driver onboarding.
- Built and integrated end-to-end features including Firebase OTP authentication, JWT-based authorization, REST API integration, and real-time ride booking workflows between Flutter applications and the Spring Boot backend.

Software Developer Intern – Mitbots **Dec 2025 – Jan 2026**
Tech Stack: Flutter, Dart, Go (Gin), PostgreSQL, Twilio, Stripe

- Developed 8+ REST APIs using Go (Gin) and PostgreSQL to support order booking, merchant management, and real-time order tracking.
- Implemented Twilio OTP authentication and integrated Stripe payment gateway for secure user verification and online transactions.

Projects

RideApp – Full Stack Ride-Hailing Platform
Tech Stack: Flutter, Spring Boot, Java, JPA/Hibernate, MySQL/PostgreSQL, Twilio SMS API, REST APIs, Render

- Designed and implemented 8+ REST APIs for OTP authentication, role validation, driver onboarding, and city-based driver discovery.
- Developed a Controller–Service–Repository–DTO backend architecture with OTP verification and deployed live APIs on Render with end-to-end Postman testing.

Embassy Cargo Service
Tech Stack: Flutter, FastAPI, PostgreSQL, Twilio, Stripe, Docker

- Developed and deployed a full-stack cargo booking platform with 10+ REST APIs using Flutter, FastAPI, and PostgreSQL, integrating Twilio OTP authentication, Stripe payment processing, and real-time order management.
- Improved backend performance by 30% through query optimization, database indexing, and API optimization while containerizing backend services with Docker for scalable and reliable deployment.

Education

KCG College of Technology 2026
Bachelor of Engineering in Computer Science and Engineering
