2. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

3. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

4. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

5. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

6. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

7. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

8. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

9. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

10. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

11. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

5.1 Remove a feed-throat obstruction

DANGER: De-energize the drive and verify zero motion before access.

A. Halt the feeder.

B. Confirm the stored force is released.

C. Remove the obstruction with the designated hook.

13. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

14. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

15. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

16. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

4.2 Clear an infeed jam

WARNING: Isolate electrical and pneumatic energy before clearing a jam.

1. Stop the infeed.

2. Verify stored energy is released.

3. Remove the obstruction using the approved tool.

18. Troubleshooting subsection

Use the applicable site procedure and consult the full OEM manual.

19. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

20. Adjustment subsection

Use the applicable site procedure and consult the full OEM manual.

21. Troubleshooting subsection

Use the applicable site procedure and consult the full OEM manual.

22. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.

23. Troubleshooting subsection

Use the applicable site procedure and consult the full OEM manual.

24. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

25. Troubleshooting subsection

Use the applicable site procedure and consult the full OEM manual.

26. Inspection subsection

Use the applicable site procedure and consult the full OEM manual.

27. Lubrication subsection

Use the applicable site procedure and consult the full OEM manual.
